

Frixos was asked to supply a range of balconies, terrace balustrades, privacy screens, wall railings, and other assorted architectural metalwork to this prestigious mixed use development in Putney, London comprising a series of 1, 2 and 3 bedroom residential apartments and penthouses over 10 storeys and contemporary commercial office space.

Since 1978, Frixos has specialised in the design, fabrication and installation of all types of structural and architectural steel work.

With an in house team of over 80 experienced and skilled designers, fabricators and installation engineers, we work hand in hand with architects, designers, developers, contractors and other authorities seeking high quality bespoke or innovative metalwork solutions to their project budgets and other specifications.

Based in north London, close to the M25, Frixos serves a wide range of housebuilder, infrastructure and private clients predominately in London and the South East. We place a strong emphasis on service and quality and take pride in the enduring relationships we have built with our clients, suppliers and partners and our ongoing commitment to safety, quality and the development of our people.
